THE RIGHT RADIO FOR EVERY WORK ENVIRONMENT

ProTalk[®] COMMERCE

Strengthen store security, elevate the customer experience, and significantly boost profits.

ProTalk[®] WORKFORCE

Enhance worker safety and productivity by enabling teams to respond quickly to shifting demands.

PKT-300

- 6-16 channel PKT-300 with 2 Watts of power. More power equals more coverage.
- Excellent voice quality even in noisy environments.
- Super compact and lightweight – clip to a lanyard, slip it in a pocket.
- Ideal for retail, hospitality, venues and other customer service industries.

NX-P1202AVK/NX-P1302AUK / NX-P1200AVK/P1300AUK NX-P1200NVK/P1300NUK / NX-1200DVK/1300DUK

- Loud, clear, world-renowned KENWOOD audio.
- Designed for manufacturing, warehousing and industrial work places.
- Digital for 20% more coverage (NX-P1200NVK/P1300NUK only).
- Meets tough mil-spec standards. IS models also available (NX-P1200NVK/P1300NUK only).

Analog Range and Coverage

VHF & UHF	Steel and/or concrete reinforced buildings	High-rise buildings
UHF 2 Watt	Up to 270,000 sq. ft.	Up to 23 floors
UHF 5 Watt	Up to 450,000 sq. ft.	Up to 42 floors
VHF 2 Watt	Up to 220,000 sq. ft.	Up to 13 floors
VHF 5 Watt	Up to 330,000 sq. ft.	Up to 18 floors

Digital Range and Coverage

VHF & UHF	Steel and/or concrete reinforced buildings	High-rise buildings
UHF 2 Watt	Up to 270,000 sq. ft.	Up to 23 floors
UHF 5 Watt	Up to 550,000 sq. ft.	Up to 50 floors
VHF 2 Watt	Up to 264,000 sq. ft.	Up to 15.6 floors
VHF 5 Watt	Up to 396,000 sq. ft.	Up to 21.6 floors

Talk range will vary based on terrain, conditions and type of radio.

ENHANCED FEATURES IN A COMPACT RADIO

Powerful, and perfect
for busy, high-noise
environments

ProTalk®

▼ PKT-300 2W UHF FM TRANSCEIVER

The PKT-300 portable radio combines a lightweight, compact design with powerful, user-friendly features. Ideal for high-noise environments, it offers 2 watts of transmit power, KENWOOD quality audio, a bright LCD display, and 6-16 channels. Perfect for fast-paced retail, hospitality, warehousing, entertainment and sporting venues with an integrated swivel belt clip and high capacity battery.

- 2 WATTS of Transmit Power
- 6-16 Channels
- 4-Digit 7-Segment LCD with Backlighting
- 4.87 oz extremely lightweight
- KENWOOD Enhanced Audio
- 2200 mAh Lithium-ion Battery with up to 14 hours of talk time *(5-5-90) and 4.5 hour fast charger
- Custom programable option
- Works with other business or commercial radios
- Built-in VOX
- Battery Saver
- Built-in Privacy Talk
- Compander
- 10-Call Alert Tone
- MIL-STD 810 C, D, E, F, G, and H
- 2-Year Warranty

DIGITAL OPERATION ENHANCES WORK PLACE EFFICIENCY

ProTalk® DIGITAL

Digital Portable Radios

The NX-P1200NVK and NX-P1300NUK portable radios harness the proven NXDN protocol to enhance coverage or FM analog for simple operations. They allow the combination of analog and digital channels in the same zone. This gives you the ability to easily migrate to digital at your own pace, or operate more effectively in a mixed environment where groups of users have different needs or solutions.

PROVIDING ESSENTIAL COMMUNICATIONS FOR MULTIPLE WORK ENVIRONMENTS

Radios That Meet Every Work Requirement

The NX-P1000 Series is designed to be a versatile, durable radio that fulfills the need for essential communications in many business settings.

Customize at Will

The NX-P1000 Series supports FM Analog and NXDN digital operation, enabling a migration to digital at your pace.

FM Analog

FM analog protocol is offered in *25 kHz and narrow 12.5 kHz channel spacing, as well as conventional operation with QT/DQT and FleetSync signalling protocol.

NXDN Digital Protocol

NXDN supports both channel bandwidths of 12.5 kHz and 6.25 kHz bandwidth using FDMA technology. NXDN provides excellent spectrum efficiency, wide coverage and scalability.

DMR Digital Protocol

Ability to upgrade from ProTalk analog to DMR Tier 2 when you're ready. DMR offers two talk paths within a 12.5 kHz bandwidth, effectively doubling the capacity for a single license and/or repeater.

* Some limitations apply in certain regions when configuring wide channel spacing.

Simple Yet Tough

Tough, Robust & Water Resistant

The NX-P1000 series radios go through stringent tests including drop, immersion, splash, key punch, extreme temperature, dust, and heavy rain to simulate the harshest operating conditions experienced in a variety of applications – both with and without the KMC-45 optional speaker microphone. The NX-P1000 series radios also meet the international ingress protection standards, including *IP54, IP55 and also meet the MIL-STD 810 C to G standards set by the U.S. Department of Defense.

*Accessory connectors must be covered.

Enhanced Audio Quality

Based on Kenwood's many years of experience with professional and high quality audio products, the NX-P1000 can be customized to deliver the best digital audio to business radio users with various language backgrounds.

Clear and Confident

Voice announcements will keep you informed of a newly selected zone/channel, function and when a PTT button is pressed, as well as reception status.

Cloning

Customize the radio programming one time and use the optional cloning cable to rapidly program groups of ProTalk radios with the same settings.

SOUND PERFORMANCE FOR SMOOTH OPERATION

▼ NX-1700H/1800H VHF/UHF TRANSCEIVERS

The NX-1700H/1800H mobile radio supports multiple protocols including NXDN and DMR as well as mixed digital & FM analog operation. It is packed with all the features essential for most enterprise and operation-critical applications. It's also equipped with optimizable TX/RX audio quality, and a customizable front panel that prioritizes simple convenience. Operational status is clear at a glance from the white backlit LCD display and 7-color LED indicator.

Scan QR Code for more detailed specifications and accessories.

▼ KAS-20

AVL & DISPATCH SOFTWARE STANDALONE & MULTI-CLIENT OPERATION

The KAS-20 Software provides AVL and Dispatch capability compatible with Kenwood digital radio systems. With the capability to run under Windows and Windows Server operating systems, it provides a cost effective package for AVL and dispatch for business, supporting both the NXDN and DMR digital protocols.

MULTI-MODE, SPACE SAVING SOLUTION

ProTalk[®] DIGITAL Repeaters

The KENWOOD NXR-1700/1800 repeater continues a tradition of migration friendly and innovative infrastructure to offer the ultimate in modern scalability and security for analog, NXDN and DMR two-way systems. Plus it now has a new, compact design. Whether you are managing a single repeater, a wide area multi-site system or are managing multiple systems remotely, the NXR-1700/1800 gives your operation versatile, digital system capabilities.

▼ NXR-1700E/1800E/1800E2 VHF/UHF ANALOG & DIGITAL REPEATER

- VHF 136-174 50 – 1 W RF Output Power (Up to 50 W @ 50%, 25 W @ 100% Duty Cycle)
- UHF 400-470 40-1W RF Output Power (up to 40W @ 50%, 25W @ 100% Duty Cycle)
- UHF 450-520 40-1W RF Output Power (up to 40W @ 50%, 25W @ 100% Duty Cycle)
- 1.71-inch OLED with Icons and Numeric Displays
- Up to 32 Channels
- Selectable Digital Protocol: DMR Tier II / NXDN Conventional (programmable one at a time)
- Built-in IP Network Adapter
- Unicast and Multicast Call Routing
- SNMP Protocol for Network Management
- IP Remote Management (Monitor / Control / Programming / Test Console)
- IP Networking Compatible with NXR-5000 (NXDN), legacy KTI-3 (NXDN) and KTI-5 (DMR)

WE HAVE THE ANSWERS

Answers to some of the most frequently asked questions.

Can a VHF radio talk to a UHF radio?

No, the VHF and UHF frequency bands are not compatible.

Is an FCC license required?

Yes, an FCC license is required. You can download FCC form 601 and instructions at www.fcc.gov/formpage.html or call 1-888-call-fcc. Your authorized KENWOOD dealer or distributor can assist you with FCC licensing.

Why are KENWOOD radios so durable and rugged?

KENWOOD knows that radios have to be built tough enough to withstand years of hard indoor and outdoor use. ProTalk radios are designed to meet or exceed rigorous Mil-Spec standards established by the U.S. Department of Defense.

How do I know which KENWOOD radio to use?

Determine how the radio will be used UHF is better indoors through concrete walls or floors, etc. VHF is better outdoors through foliage or line of sight. Also, higher power means a radio will have a wider coverage area.

Are KENWOOD radios compatible with other business radios?

Yes, all you have to do is match the frequency, code, and communication style (analog/digital).

How long will the KENWOOD battery last and how long does it take to recharge?

Charging Time	Li-Ion Battery Rating	Li-Ion Battery Life	Radio Weight Including Battery
PKT-300			
4.5hrs	2,200 mAh	14/18 hrs	4.87oz
NX-P1200AVK / NX-P1300AUK / NX-P1200NVK / NX-P1300NUK			
3hrs	2,000 mAh	11.5/12.5 hrs	9.88oz
NX-P1202AVK / NX-P1302AUK			
3hrs	2,000 mAh	15/16.5 hrs	9.88oz

Battery Save Function Off / Battery Save Function On

Return on Investment

KENWOOD ProTalk radios rapidly pay for themselves.

Hourly Wage (with benefits)	7 minutes per hour savings per worker = 56 Minutes per day	Annual savings for a 12 person staff
\$12.00	\$2,688 Per Year	\$32,256
\$15.00	\$3,360 Per Year	\$40,320
\$18.00	\$4,033 Per Year	\$48,396

RELIABLE POWER, READY WHEN YOU ARE

Portable Power Station

The LiFePO4 lithium iron phosphate battery is designed to deliver optimal performance with advanced features that ensure longevity and reliability. The "Automatic Power Supply System" protects against battery degradation and malfunctions, while the fast 1.5-hour charging capability eliminates the need for a bulky AC adapter. With a comprehensive battery management system controlling voltage, current, and temperature, and a sine wave inverter that prevents equipment damage while suppressing noise and vibration, this system is built to meet demanding conditions with precision and care.

PORTABLE POWER STATION

Why KENWOOD Portable Power Station?

Trust

KENWOOD has been providing high-quality, cutting-edge products for over three-quarters of a century, earning the trust of sales, customers, and partners around the world.

Reliability

Engineered to excel in tough environments, KENWOOD products are built to meet stringent design and quality standards with extensive durability and safety tests.

Advanced Technology

KENWOOD aims to remain an industry leader in technology and consistently deliver top-tier products with advanced design and outstanding performance.

About KENWOOD logo: The iconic white letters and red triangle on a black background symbolize technology and quality, offering users a reliable source of energy and peace of mind.

6 Reasons to Choose ANALOG Two-Way Radios

Two-way analog radio is a reliable choice for most users. Here are some of the key benefits:

AFFORDABLE: Because the technology is not software-enhanced, it is simpler and affordable.

BASIC ENCRYPTION: Basic encryption means users still have secure channels.

EASE OF USE: It is simple to use and since little training is needed, users can get up and running quickly.

NATURAL VOICE: It is a popular choice with some users as it offers natural voice communications.

SIMPLE, BUT RELIABLE: It can be a reliable option for organizations with relatively simple communication needs and a limited geographic footprint.

TIME TESTED: Analog radio technology has been used across many industries.

6 Reasons to Choose DIGITAL Two-Way Radios

Software-based digital two-way radios have enhanced data-rich features:

ADVANCED ENCRYPTION: Advanced encryption means more options for secure communications.

VOICE QUALITY: Digital radios block background noise and deliver improved voice quality, expanded coverage, and no degradation in voice quality over distances.

DIGITAL FEATURES: These include much higher GPS throughput, IP data, OTAP data, large databases of group and unit IDs that allow for more efficient system usage.

ERROR-CORRECT FEATURE: Voice signals are rebuilt if a signal gets corrupted because of interference.

MULTIPLE COMMUNICATIONS ON ONE CHANNEL FOR GREATER EFFICIENCY: Several users can communicate over a single channel.

IMPROVED COVERAGE AND IN-BUILDING PENETRATION: Enhanced radio signals ensure reliable communication across wider areas and better penetration through structures.
